

Is 5G Hazardous to Your Health?

5G Small Cell Tower RF Antennas are being mounted on street lamp and power poles near homes.

Is it safe, what are the risks, health hazards, and property value impacts?

Join Us for a FREE Seminar Presented By:

Eric Windheim, BBEC, EMRS, Windheim EMF Solutions

Thursday, February 20, 2020 6:00 - 8:00 PM

Sunrise Natural Foods, 1950 Douglas Blvd, Roseville (916) 789-8591

Limited Seating. Arrive Early.

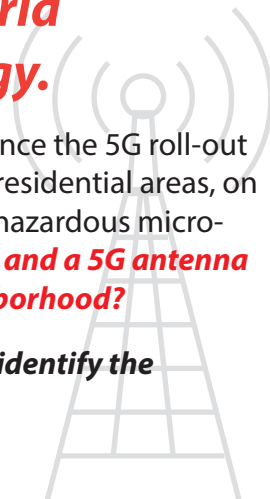

Sacramento is one of the first cities in the world to implement 5G Small Cell Tower technology.

Roughly 600 new antennas have been installed in Sacramento alone since the 5G roll-out began in October 2018. Many of these antennas are being installed in residential areas, on lamp poles, exposing nearby residents to **UNPRECEDENTED** levels of hazardous microwave radiation exposure. ***How can you identify a 5G Small Cell Tower and a 5G antenna mounted on a street lamp or electric utility pole/tower in your neighborhood?***

Learn more detailed information, including resources and photos to identify the 5G hazards in your area:

What You'll Learn At The Seminar

What steps are needed to minimize electromagnetic radiation (EMFs) to your home and create a safe environment and a Sleep Sanctuary for better health. Which household devices emit EMFs and how do they damage your health? What steps are needed to make your home a safer place to live? Which supplements protect and restore you from EMF damage?

Less EMF - Better Health - Live Longer

About The Presenter

Eric Windheim, is the founder of Windheim EMF Solutions, is a certified Building Biology Environmental Consultant (BBEC) & Electromagnetic Radiation Specialist (EMRS). Eric provides EMF assessments that detect, measure, assign risk levels & reduce EMF exposure in your home, office, or business. *Contact us today to book your assessment!*
